Stepping Stones To Your Future

A. James Clark School of Engineering
University of Maryland

What Past Participants say:

“You have fun, you meet new friends, and learn more about engineering at the same time.”

“This is a hands-on camp with lots of fun things to do. It’s awesome!”

“It is a very good experience and chance to learn about different aspects of engineering.”

Stepping Stones To Your Future

Engineering Summer Camp for Rising 7th and 8th Graders
Hosted by WIE

Two Sessions in 2014:
July 14-18
July 21-25
Stepping Stones to Your Future is an annual summer engineering camp for rising 7th and 8th graders, offered by the University of Maryland, College Park. This one-week commuter camp is a great opportunity for young men and women who are interested in science and math to learn about engineering through fun, hands-on activities.

What Will I do at UMD?
Campers will work with current engineering students to discover what engineering is all about. Through a variety of fun and exciting hands-on activities, group projects, and design challenges, you will learn about engineering concepts and applications, and what engineers actually do!

What are the dates and time?
We will be offering two sessions of SSTYF:
- July 14-18, 2014
- July 21-25, 2014
The camp runs from 9:00 am - 3:30 pm daily. Stepping Stones staff will meet you on campus beginning at 8:30 am each morning. Lunch will be served at one of the dining halls at the University of Maryland.

What is the Cost?
The cost of the Stepping Stones Camp is $350.00 per participant. Please do not send the fee with the application! Upon acceptance into Stepping Stones, the commitment fee of $350.00 will be due in late May 2013. Partial scholarships are available based on financial need.

Who Can Apply?
If you are entering 7th or 8th grade in Fall 2014 and are interested in math, science or engineering, you are strongly encouraged to apply.

How do I apply?
To apply, please visit our website (wie.umd.edu/k12/sstyf) to complete the online application and download a teacher recommendation form.
The online portion includes biographical information and the student’s personal statement. A letter of recommendation from a current math or science teacher completes the application.
Completed applications are due on March 14, 2014. Decisions will go out once all applications have been reviewed.

We look forward to seeing you this summer!
